Magnus Logistics Environmental Policy

UAB Magnus Logistics, understanding the importance of environmental protection, assumes responsibility for the environmental impact of the organisation and undertakes to:

- ▶ Comply with the legal requirements relating to environmental aspects that are applicable to the company, and perform other obligations assumed by the company;
- ▶ Implement and continuously improve the environmental management system in accordance with the requirements of ISO 14001;
- ▶ Constantly monitor, analyse and improve the efficiency of environmental protection by the company;
- ▶ Monitor and reduce CO2 emissions from freight transport activities;
- ▶ Involve carriers in the performance of the Environmental Policy and exchange information with them on environmental issues on a regular basis;

- ▶ Promote the sorting and proper disposal of waste;
- ▶ Involve all employees of the company in environmental activities, organising training and developing their personal responsibility for a clean environment;
- ▶ Identify the needs of customers in the field of environmental protection, forecast them and meet them;
- ▶ Ensure that the Environmental Policy is accessible to customers, carriers, the public and other interested parties.

Implementation

In order to implement this Policy, Magnus Logistics will set yearly targets to reduce CO2 emission from freight transport (click here for details on **implementation methods** and **CO2 emission report**). This Policy will be reviewed periodically and updated as necessary.

For more information in implementing environmental policy in practice, please contact the responsible person by e-mail **conduct@magnus.eu**
